# Payroll

### Problem

A division of a larger company was sold to an investor. Suddenly they would go from a large operation to a small one. The parent company gave them a date, on which they would be separated from the parent company's systems. All software licensees needed to be re-licensed. The parent company used People Soft for Payroll.

### Solution

ACS researched payroll system options and interviewed and negotiated with third party vendors, including Great Plains, Lawson, People Soft, Solomon Financials, Net Suite, Quick Books and McCormick & Dodge. Fidelity's web-based solution and Solomon were selected. A transition process lasted one month.

### Results

The new Payroll system went live on schedule. ACS "pulled it off. They so pulled it off."
